

MODI-SYSTEMS, INC. introduces the

## RENOVA DRAIN

The Renova Drains are specifically made for use with single ply and modified Membranes.

Any single layer of material can be clamped to the flange, example – Modified, PVC, EPDM, TPO.

RENOVA SPECIAL FEATURES are as follows:

- Renova drain is retro fit and installed with manual pressure.
- No tools of any kind are needed.
- Rubber rings make up to 15 individual seals gripping the inside of the pipe, guarding completely against back-flow, leakage and possible water damage.
- Rubber rings act as an expansion joint, removing risk of buckling or leakage by thermal cycling
- Polypropylene construction offers excellent durability, resistant to acid rain, industrial smog, bird droppings, UV rays or extreme temperatures.
- Stainless steel clamp ring and hardware provides even-pressure clamping for any membrane to the 12" flange.
- Scientifically designed "chute" profile enhances flow off the roof and into the down pipe.
- Renova drains are available in 3 inch, 4 inch, 5 and 6 inch.

Please call you local sales rep or Modi-Systems should you require further information.
